WORK EXPERIENCE

Nuvitek, Washington, DC

2024 - Present

Platform Engineer (US Department of Labor)

- Owned a public-facing federal application serving nationwide workforce training outcome data on AWS EKS, Drupal backend, Angular frontend, Elasticsearch search layer.
- Operated containerized workloads on AWS EKS with kubectl - pod access, log inspection, and production troubleshooting. Diagnosed recurring OOMKilled failures on large migration jobs and specified the memory-limit increase that resolved them.
- Managed Jenkins build and deployment pipelines for containerized applications, promoting releases across Development, Test, Staging, and Production, including Akamai CDN invalidation at production cutover.
- Architected and containerized an internal learning platform on AWS ECS/Fargate using a custom Docker image, provisioned end-to-end in Terraform, replacing a vendor-packaged deployment.
- Led incident response for a SAML certificate rotation failure that disrupted production authentication; restored access and authored the runbook now used for scheduled rotations.
- Served as de facto project manager, business analyst, and QA lead following a team reduction.

United States Gold Bureau, Austin, TX

2023 - 2024

IT Support and Systems Specialist

- Supported 200+ end users, managed implementation of Apple mobile device management solution, trained new IT staff, automated company processes using code (Powershell, Go, Bash), M365/Entra Admin

Texas Army National Guard - 36th Infantry Division Band, Austin, TX

2007 - Present

Sergeant First Class, Music Performance Team Leader

- Supervise a platoon of 12 soldiers and lead performance team of 18 soldiers

EDUCATION

The University of Texas at Austin - Master's in Music and Human Learning

Tennessee Technological University - Bachelor's in Music Education
